CDC 1725

REDEFINING COLOUR!

Produce your documents with the innovative CDC 1725 multifunctional colour system – and the results will speak for themselves. Thanks to its new toner technology and only 8.1 seconds for the first page in colour and 6.2 seconds for black/white, you will have any colour document on your desk, from A6R to A3, in no time at all and in absolutely brilliant quality. This eases your workload, particularly as its performance is especially durable, reliable and economical and it looks good too with its new elegant anthracite design!

TECHNOLOGY THAT SETS THE TONE – NO MATTER WHERE YOU LOOK!

Using an optimised toner control, the CDC 1725 prints text and lines with precision and provides an expanded colour range for image reproduction. In conjunction with the trapping function (to avoid white gaps) and innovative development engineering, the CDC 1725 achieves only the best in optical performance. With a vertical paper feed and 25 A4 colour pages per minute, an optional document processor for simultaneous duplex scanning, further optimised area segmentation of text and graphics, and the creation of compressed PDF files to reduce the data volume, the CDC 1725 gives an efficient and productive performance. All of this is complemented by additional features such as extensive security settings, SynControl technology for parallel data processing, the extremely user-friendly colour display and flexible operation using the USB direct print and scan-to-USB features. To sum it up: Pure perfection!
